

SHAZA HAMDY MOHAMED

FULL- STACK DEVELOPER

shazahamdy011@gmail.com | +201018591869 | Minya, Egypt | <https://www.linkedin.com/in/shaza-elshimy/> | <https://github.com/Shaza-Elshimy> | <https://portfolio-website-pearl-tau-83.vercel.app/>

SUMMARY

Software Developer with practical experience in developing responsive web applications and AI-integrated products. Trained through the Information Technology Institute (ITI) program and worked on real-world collaborative projects. Skilled in modern web technologies, AI-assisted coding, product development, and testing. Passionate about problem-solving, developer experience, and building maintainable code within cross-functional teams.

EDUCATION

Bachelor of Science, Information Technology Minia University - Faculty of Science

10/2021 - 07/2025

Relevant coursework includes Web Development, Database Systems, Software Engineering, and Programming Fundamentals. Gained strong foundation in problem solving, data structures, and application development. Participated in academic and practical projects focused on building web applications and improving technical skills.
Grade: Excellent with Honors

Full-Stack Developer

10/2025 - 08/2026

ITI Training 9 Month Scholarship program, Assuit

Completed intensive full-stack web development training and worked on multiple real-world and practice projects. Gained hands-on experience in building responsive web applications, developing RESTful APIs, and working with databases. Participated in team-based development using Git and GitHub. Focused on improving code quality, performance, and user experience.

- Built multiple full-stack web applications during training
- Developed responsive user interfaces using modern front-end technologies
- Implemented back-end logic and RESTful APIs
- Worked with database integration and data management
- Used Git and GitHub for version control and collaboration
- Delivered projects within deadlines

PROJECTS

Morshid — AI Socratic Teaching Assistant

Frontend Developer / Human Review & Instructor Workflows

Link: <https://github.com/Shaza-Elshimy/Morshid>

Demo: <https://drive.google.com/drive/folders/1AKRRM3a2-LFRHCIEtw3JiepW4G5UFCUM>

React, TypeScript, TanStack Query, NestJS, PostgreSQL, pgvector, Redis, AI/RAG

- Built the human review workflow that allows students to flag AI responses and instructors to review, resolve, and communicate decisions securely.
- Developed instructor review queues, filtering, workload information, and resolution actions to streamline administrative tasks.
- Implemented the student-facing resolution flow and in-app notifications, connecting instructor decisions back to the relevant conversation without exposing private review data.
- Improved course-material reliability through retry and duplicate-upload handling for failed material uploads.
- Built authentication screens and role-aware navigation across student and instructor experiences.
- Added end-to-end tests covering review privacy, repeat submissions, and instructor resolution flows to ensure robustness.
- Contributed to public pages, dashboards, and staged CSV import review within a collaborative sprint-based team emphasizing remote collaboration and code review.

E-commerce Web Application

Front-end Developer

HTML5, CSS3, JavaScript

- Developed a responsive e-commerce web application with a modern and user-friendly UI.

- Implemented product browsing, product details, shopping cart, and checkout features.
- Built authentication pages including login and registration.
- Ensured full responsiveness across mobile, tablet, and desktop devices.
- Improved user experience through clean layout and intuitive navigation.

TickTracker Dashboard – Task Management System

Front-end Developer
HTML5, CSS3, JavaScript

- Developed a responsive task management dashboard for organizing and tracking daily tasks.
- Implemented task status management features (New, In Progress, Completed).
- Built a clean, modern, and user-friendly interface to improve productivity.
- Ensured full responsiveness across mobile, tablet, and desktop devices.
- Wrote clean and maintainable frontend code.

Medical Appointment Booking

System Full Stack Developer
React.js, Node.js, Express.js, MongoDB, Tailwind CSS, RESTful APIs

- Developed a full-stack medical appointment booking system focused on the patient experience.
- Implemented features for browsing doctors, viewing profiles, booking appointments, and managing scheduled visits.
- Built a smooth and user-friendly appointment scheduling flow.
- Developed reusable components such as DoctorCard, AppointmentCard, and AppointmentList.
- Improved UI consistency and overall user experience.

ITI Cafeteria Management System

Full Stack Developer
PHP, MySQL, HTML5, CSS3, Bootstrap 5, MVC Architecture

- Built a full-stack cafeteria management system for institutional use with separate admin and user interfaces.
- Implemented role-based authentication (admin/user) with secure access control.
- Enabled users to browse products, place orders, and track order status in real time.
- Developed admin dashboard to manage products, users, and system activity.
- Added analytics features showing key stats like total products, availability, and recent orders.

SKILLS

Programming & Core: JavaScript(ES6), PHP, Python
Front-end Development: HTML5, CSS3, Responsive Design, React.js, Tailwind CSS, Bootstrap, Angular, Vue.js , TanStack Query
Back-end Development: Node.js, Express.js, NestJS, RESTful APIs, HTTP, PostgreSQL, pgvector, Redis, MongoDB, MySQL, Laravel, PHP
AI & Workflows: AI-assisted coding, RAG concepts
Tools & Technologies: Git & Github, Docker Postman, Linux basics, Bash Scripting, Figma ,
Practices: Remote Collaboration, Product Development, Testing, Debugging, Code Review, Developer Experience

EXPERIENCE

Freelance Full Stack Developer 01/2026 - Present
Freelance, Remote
Worked on freelance web development projects based on client requirements. Developed responsive web applications using modern front-end technologies and built dynamic dashboard interfaces. Focused on creating reusable UI components and ensuring full responsiveness across all devices. Improved user experience, interface consistency, and overall application performance.

- Developed responsive web applications and dashboards using React.js
- Built reusable and modular front-end components
- Ensured full responsiveness across mobile, tablet, and desktop devices
- Improved UI/UX design and user interaction flow
- Delivered projects based on client requirements within deadlines
- Optimized front-end structure and application performance
